Front-End Optimization

> ⚠ **FEO has been decommissioned**
> What this means:
>
> - **FEO configurations no longer apply to the delivery of your property**.
> - **The FEO API no longer functions**.
> - **Functionality in the Front-End Optimization Configuration tool has been removed**. You can only use it to get your FEO configuration metadata. (See below.)
>
> *The Front-End Optimization configuration tool will be fully decommissioned in August 2023*.

Get your FEO Metadata

Download the metadata that defines your FEO configuration. Review it with your account team to see if you can apply it using other services in your Ion property.

1. From the Front-End Optimization Configuration interface, find your configuration in the table and select **ACTIONS** (**...**) > **View Metadata** to access it.
2. Return to your Ion property in Property Manager Editor and remove the **Front-End Optimization** behavior.
